

PROJECT BACKGROUND

Project Intent

Kershaw County and the Central Midlands Council of Governments have initiated a plan to focus on identifying the right balance between growth, transportation needs, and the community's desires for the future. The Sub-Area Plan is considering mobility, safety, convenience, and comfort for all modes of transportation coupled with the impact to adjoining land uses and the unique character of the area. The sub-area under study is the southwest corner of Kershaw County, including Elgin and Lugoff.

Elements of the Planning Process

- Establish Baseline Existing Conditions
- Analysis & Evaluation
- Needs Assessment
- Recommendations
- Final Study Report

Study Area

The map at right depicts the Study Area for the West Wateree Transportation Study. This should not be considered a definitive study area, but rather should be viewed as an approximate area providing context for the evaluation of the area to determine the most appropriate improvements. Analysis will be within proximity of this area and recommendations will seek to affect positive change for the Study Area.

Please utilize the larger maps provided tonight for documenting your comments.
