

**REQUEST FOR PROPOSALS
ADDENDUM 1**

**TOWN OF WHITMIRE CHURCH STREET WATER LINE UPGRADE
ENGINEERING SERVICES
CDBG Project # 4-CI-18-013**

The purpose of this addendum is to provide answers to questions and/or requests for clarification received by prospective RESPONDENTS.

1. Does the Town of Whitmire have a budget for engineering design/permitting, or for construction?

The CDBG grant awarded to the Town of Whitmire has a budget for engineering design/permitting and for construction. The total construction cost estimate for the project is \$763,200. This includes construction for water facilities and street improvements. The engineering cost estimate is based on a percentage of the construction cost as allowed by the CDBG program. Please note that per Section 5.3 of the RFP the cost proposal for engineering services is part of the selection criteria.

2. Are engineering fees paid by the Town of Whitmire or by CDBG?

The engineering fees are part of the federal cost share for this project and will be paid for with CDBG funds. Please note, as stated in Section 2.13 of the RFP, because this project is funded in whole or in part by the CDBG program, all federal CDBG requirements will apply to the resulting contract.

3. What is the Engineer's cost estimate for the project?

See answer to question 1 above.

4. Is a survey of existing topography, right-of-way, aboveground features, and underground utilities available? If not, will that be required as part of this project?

No surveys have been completed for the project. Any surveys needed to complete the Engineering Scope of Work outlined in Section 1.2 of the RFP should be included as part of the RESPONDENTS proposal.

5. Is the Engineer's Preliminary Engineering Report available for review by proposers?

The Town of Whitmire does not have a Preliminary Engineering Report (PER) for this project.
